5.1.2 Capacity building and skills enhancement initiatives taken by the institution include the following

2. Language & Communication skill

The significance of communication is strongly intertwined with the features of the engineering world. Engineers must be able to communicate effectively and clearly with a wide range of people, including clients, vendors, consumers, clients, and even authorities, and many other colleagues from various industries. Knowing a foreign language is advantageous for people working in a foreign setting, whether in a foreign country or with customers from all over the world. Engineers with strong communication skills can confidently present their ideas in presentations, meetings and reports.

5.1.2 Capacity building and skills enhancement initiatives taken by the institution include the following

4. Life Skills

Life skill management for the adolescent is a pre-requisite of today's world. Life skills enable individuals to deal effectively with the demands and challenges of everyday life. It transforms a person into a "Balanced Adult" who makes a meaningful contribution to society. Life skills are applied in different spheres of life, such as human relationships, learning about rights and responsibilities, and health issues like Drug abuse, suicide prevention. And other mental health issues. In addition, this skill empowers students to take proactive measures to protect themselves. As well as to promote health and positive social relationships, including other applications such as the environment, education, consumer education, peace education and social-cultural issues.

5.1.2 Capacity building and skills enhancement initiatives taken by the institution include the following

5. ICT Computing Skills

Employers in a wide range of industries are vying for college graduates with ICT abilities. Computing Science assists students to acquire more advanced skills and knowledge. It also broadens one's understanding of technology and its understanding. Students learn technical skills such as coding/programming as well as theoretical knowledge of topics such as ROBOTICS and web CISCO. Work experience is usually included in ICT courses so that students improve practical skills and make valuable industry connections.

CCNAV7: Introduction to Networks

The student has successfully achieved student level credential for completing CCNAV7: Introduction to Networks course administered by the undersigned instructor. The student was able to proficiently:

- Configure switches and end devices to provide access to local and remote network resources.
- Explain how physical and data link layer protocols support the operation of Ethernet in a switched network.
- Configure routers to enable end-to-end connectivity between remote devices.
- Create IPv4 and IPv6 addressing schemes and verify network connectivity between devices
- Explain how the upper layers of the OSI model support network applications.
- Configure a small network with security best practices.
- Troubleshoot connectivity in a small network.

Cisco Networking Academy

Certificate of Course Completion

CCNAv7: Enterprise Networking, Security, and Automation

The student has successfully achieved student level credential for completing CCNAv7: Enterprise Networking, Security, and Automation course administered by the undersigned instructor. The student was able to proficiently:

- Configure single-area OSPFv2 in both point-to-point and multiaccess networks.
- Explain how to mitigate threats and enhance network security using access control lists and security best practices.
- Implement standard IPv4 ACLs to filter traffic and secure administrative access.
- Configure NAT services on the edge router to provide IPv4 address scalability.
- Explain techniques to provide address scalability and secure remote access for WANs.
- Explain how to optimize, monitor, and troubleshoot scalable network architectures.
- Explain how networking devices implement QoS.
- Implement protocols to manage the network.
- Explain how technologies such as virtualization, software defined networking, and automation affect evolving networks.
